it may not be obvious why someone like myself would write my memoir i am not a famous person i am not a professional athlete i am not a politician i am not even known in my local area of north carolina i do not fit into any of these typical categories of autobiographical writers however as in most people i have a story to tell that is unique from many and common to some we all have stories that people can relate to and sympathize with if only we just tell them i find a great relief when i learn that others have survived similar struggles that i am going through i am living proof that it is possible to live through many things and come out the other side a better person

client centered exercise prescription third edition with resource emphasizes a personalized approach to exercise in which unique programs meet the interests and needs of individual clients. This resource will help you to prescribe exercise and guide clients in adopting, enjoying, and maintaining active lifestyles. Client centered exercise prescription third edition expands the role of the fitness professional from simple exercise prescription to include activity counseling, design modification, exercise demonstration, functionally integrated exercise injury prevention, and follow-up monitoring for a variety of clients. Central to the book are seven client centered models for each major fitness component that serve as a template of options for each decision in the prescription process. Activity counseling, musculoskeletal exercise design, exercise demonstration, cardiovascular exercise prescription, resistance training prescription, muscle balance and flexibility prescription, and weight management prescription. The text explains the vital role that functionally integrated exercise plays in improving performance and maintaining musculoskeletal health and teaches how to recognize muscle imbalance and prevent complications. Fitness professionals will learn to make informed client centered decisions and address the following issues: establishing rapport and increasing adherence by prescribing exercise programs that match clients' desires, needs, and lifestyles; understanding clients' unique psychological needs and using that information to keep them motivated; monitoring clients' needs both as they are originally presented and as they evolve over time; applying strategies for treating and preventing overuse injuries so that clients avoid injury and frustration thereby avoiding withdrawal from the program; addressing the unique considerations of aging clients including musculoskeletal conditions and functional mobility. The third edition of client centered exercise prescription retains the client centered approach of previous editions offering simulated initial interviews with clients, teaching cues for demonstration, sample sessions, and sample
