The book, Fish and Fisheries, comprises thirty-four chapters which include both ichthyology and fisheries. This book, written in a lucid style and having very high standard of presentation, selected topics from fish anatomy, fish physiology, identification of fishes, and fisheries. This book has been incorporated in this book which are extremely useful for the honours and postgraduate students of Indian universities. Reading fishery science, balanced description, well-labelled beautiful illustration, and mention of pioneer contributions are some of the special features of this book. While compiling the manuscript of this book, all important books and journals concerned have been consulted. So far, some fresh water fishes of India have been described with latest classification, diagnostic features, distribution, and fin formula in the book. The book has been thoroughly revised and enlarged. Some new chapters like food feeding habits and alimentary canal skeleton common biota of fish ponds of India, fish and pesticides, and fisheries institutions in India have been added. Some old sketches have been replaced, and also some new have been added. This will be quite useful for the students particularly for their practical classes. Matters described in this book are comprehensive, accurate, and up to date. All efforts have been made to make the book of prime utility for the students.
