Lab Manual (Grade 3)(Harcourt Science: Ohio Edition ???)

2022-12

this laboratory manual presents a curriculum that is organized around an atoms first approach to general chemistry our motivation for writing this manual is to 1 tap into the natural curiosity present in all of us and provide engaging experiments that students will find interesting 2 emphasize topics
that students find particularly challenging in the general chemistry lecture course and 3 create a laboratory environment that encourages students on occasion to solve puzzles and not just follow recipes all too often students view general chemistry lab as a boring exercise in which an exact set of instructions is followed leading to an answer that in many cases results in a good grade regardless of how much learning has taken place to these students the successful lab is the one that takes the least amount of time unfortunately a huge opportunity to get students truly turned on to science is missed to us the laboratory represents high stakes ground for engagement and relatively low stakes for grading as the laboratory is typically a single credit course or minor component to the lecture grade thus while the rigor of the experiments in this manual can be tuned to meet the needs of the instructor our hope is that students will be encouraged to play safely with chemical concepts and laboratory techniques with grades simply being a natural consequence of their laboratory actions to facilitate such a mindset this manual has been written to provide instructors with a weekly tool that can attract and keep student interest while providing important connections to the material covered in an atoms first lecture course our philosophy student curiosity leads to engagement which leads to discovery which leads to learning the manual is for a freshman level general chemistry laboratory course and serves as an ideal supplement for any atoms first general chemistry textbook such as chemistry atoms first by julia burdge and jason overby it is designed for students at all levels from those seeing chemistry for the first time to chemistry majors
the student lab manual provides hands on experiences that range from short in class or at home assignments to 45 50 minute in class assignments discovery experiences provide the challenges necessary to reinforce concepts labs follow a standard lab sequence background information problem materials procedure observations analysis conclusions

there are several projects activities in the computer lab manual for students to indulge experience the necessary applications of a computer such as paint tux paint this book aims to provide pupils with practical knowledge they can use whenever necessary the content of this book is written keeping in mind the nep 2020 guidelines
