The journal of evidence based practices for schools is a leader in publishing research to practice articles for educators and school psychologists. The mission of this journal is to positively influence the daily practice of school-based professionals through studies demonstrating successful research-based practices in educational settings. As a result, the editors are committed to publishing articles with an eye toward improving student performance and outcomes by advancing psychological and educational practices in the schools they seek. Articles using non-technical language that 1. Outline an evidence-based practice, 2. Describe the literature supporting the effectiveness and theoretical underpinnings of the practice, 3. Describe the findings of a study in which the practice was implemented in an educational setting, and 4. Provide readers with information they need to implement the practice in their own schools. In a section entitled Implementation Guidelines, the journal of evidence-based practices for schools differs from other scholarly journals in that it features articles that demonstrate empirically based procedures for readers to apply the practice in their setting. Skills intervention for algebra is a convenient educational tool that increases and maintains mathematical competency. The skills intervention programs are easy to use, manageable programs for summer school, after school, and intervention programs. Updated in conjunction with academic skills problems, fifth edition, the companion workbook contains reproducible forms discussed in the text as well as additional useful materials for direct assessment, intervention planning, and data-based decision making. The workbook is geared to service delivery in a multi-tiered system of support (MTSS). It features step-by-step instructions for using each form along with exercises for practicing assessment processes and procedures. The convenient large size format facilitates photocopying. Purchasers also get access to a webpage where they can download and print the reproducible tools. New to this edition, revised throughout by new coauthor Nathan H. Clemens, while retaining the core elements of Edward S. Shapiro’s approach, more concise and accessible throughout.
