Integrated Risk of Pandemic: Covid-19 Impacts, Resilience and Recommendations

2020-10-31 in light of the novel corona virus outbreak in December 2019 and its subsequent impact on entire world as a global pandemic the book attempts to provide integrated risk assessment on covid 19 like pandemics as well as to understand the societal environment and economic impact of the outbreak in various sectors of development it covers fundamental factors of global disease outbreaks and its coverage as major disaster through the complexity and severity of consequences illustrating the dimensions of low frequency high intensity disasters it brings together broad range of topics including basic concepts isolation measure role of governance and key technical advancements for containing the diseases in addition it also covers resilience analysis towards the impacts such outbreaks have on bio diversity ecosystem services and agricultural food production it defines key exit strategies from the lessons learned and success stories of historical disease outbreaks the book is presented in four parts where part 1 familiarizes with fundamentals part 2 focuses on integrated risk assessments part 3 focuses on various measures and strategies of resilience and part 4 suggests key lessons and recommendations the book is a useful reading reference for scientific community policy makers and professionals across the domains of health environment disasters and sustainable development book is specifically beneficial for postgraduate students researchers planners and field professionals

Weathering the Storm

2006 in our lifetime we have never experienced a disaster with effects as widespread as the covid 19 pandemic the
terrorist attacks of 9 11 certainly caused upheaval but they didn t force people to shelter at home or cause churches to stop meeting as we slowly work back to our normal lives or a new normal we must recognize this will not be the last major disaster we will ever have to face but what does that mean for the church especially the local congregation

Faith in the Shadow of a Pandemic 2020 highlighting american cultural and political contexts this book provides an in depth assessment of the breadth and magnitude of the united states errors in its response to the covid 19 pandemic an unmitigated disaster chronicles and explains the u s response to the covid 19 pandemic emergency management expert robert o schneider considers the quality of u s pandemic planning and preparedness the quality and effectiveness of national state and local response efforts and the performance of national leaders during this historic public health crisis the book culminates in an assessment of how a predictable public health threat became an unprecedented health economic and security disaster schneider convincingly shows that conscious decisions were made by governmental authorities beginning with the president to ignore expert information and security intelligence in pursuit of other objectives in other words schneider argues if the u s was ill prepared for or slow to respond to the crisis it was because its leaders consciously chose to be ill prepared or slow to respond readers will be fascinated by this behind the scenes exposé of a pandemic year

An Unmitigated Disaster 2022-01-11 what just happened the human cost of the emergency response to covid 19 has far outweighed the benefits that s the sobering verdict of a trio of scholars a biologist a statistician and a philosopher in this comprehensive assessment of the worst panic induced disaster in history as the media fanned the flames of panic government officials and a new elite of scientific experts ignored the established protocols for mitigating a dangerous disease instead they shut down the world economy closed every school confined citizens to their homes and threatened to enforce a regime of extreme social distancing indefinitely and the american public amazingly enough complied without protest modestly but relentlessly focused on what we know and don t know about the coronavirus douglas axe william m briggs and jay w richards demonstrate in this eye opening study what real experts can contribute when a pandemic strikes in the early spring of 2020 the panic of government officials the hysteria of the media and the hubris of suddenly powerful scientists produced a worldwide calamity the price of panic is the essential book for understanding what happened and how to avoid repeating our deadly mistakes

The Price of Panic 2020-10-13 the ongoing covid 19 disaster and the universal realization of the inevitability of even worse pandemics in the future has resulted in a wealth of books scientific papers and journalistic analyses of the politics medicine and human suffering the nature of pandemics is not an outcrop of covid 19 publication frenzy conceived in the period between the outbreaks of sars and ebola the book addresses the critical but commonly overlooked issues that limit readiness recognition and rapid response to emerging biodisasters the book is unique in its approach to pandemics it offers a holistic view of the nature of pandemics as a phenomenon and of the challenges involved in mounting an organized concerted response to a worldwide lethal bioevent most healthcare professionals at national and international levels recognize the danger the political efforts to establish consistently effective countermeasures are sporadic and dissonant when they do occur the slow and politically safe approach the failure to react quickly and unhesitatingly mobilize all resources remain the paramount obstacles to the effective containment of a pandemic the individual chapters of the book are written by internationally respected experts from africa europe and north and south america the contributing authors represent a cross section of professions involved in counter pandemic activities some operate at the highest levels of national and international institutions others work as clinicians specializing in infectious diseases scientists experts in public health law and its enforcement or military aspects of pandemics their contributions often highly personal and perhaps even controversial supported by their involvement in the front line challenges of pandemic containment and mitigation provide a rare combination of first hand knowledge of the
current state of the art and recommendations for the implementation of best practices the nature of pandemics offers multifaceted insight into problems that if ignored initially come to mar all subsequent response and mitigation efforts the content spans solutions to developing readiness and mobilizing response as much to the current pandemic as to the future ones addressing government generated roadblocks to response military and security issues global supply chain infrastructure communications information technology ethical dilemmas posed by vacillating quality of care and the inevitable mass fatalities together with the confused interaction of global health organizations and response agencies the book examines the panoply of complexities not only at the center of a pandemic outbreak but also at its equally critical and deadly periphery

The Nature of Pandemics 2022-11-03 some periods of history contain so many compounded disasters they seem to be inspired by disaster movies in the early 2020s the covid 19 pandemic upended the world and thrust populations into a state of uncertainty and fear as seen in movies like outbreak the towering inferno or armageddon birthed from the author s original research on disaster movies this book argues that the life cycle of covid closely parallels various apocalyptic films from the personas of the main players to the strike of the cataclysm itself to view the covid pandemic through the language of disaster movies the book identifies those that mirror predict each stage of the covid pandemic analyzing the similarities between the films and real life events a filmography of the featured disaster movies concludes the book

Are We Living in a Disaster Movie? 2022-08-04 pandemic risk response and resilience covid 19 responses in cities around the world examines the pandemic s global impacts on public health economies society and labor the book shows how covid 19 intensified natural and anthropogenic hazards and destroyed years of communities governments and the work of development organizations and their investments it focuses on how disaster resilience is central to achieving the 2030 sustainable development goals in a post covid 19 era sections cover current governance practices with special attention given to asias more successful responses it shows how the various sectors across that society were most impacted by covid 19 including tourism and food systems this book is an essential reference for researchers and practitioners who need to understand response preparedness and future pathways for pandemic resilience showcases risk governance at local national and regional scales captures multidisciplinary and multi sectoral insights through numerous case studies uniquely addresses in a comprehensive and structure manner risk governance methodologies

Pandemic Risk, Response, and Resilience 2022-05-20 perspectives in a pandemic is a series of enlightening essays written by kevin m cahill m d providing a unique insight into the early phase of the covid 19 pandemic dr cahill draws on his extensive experiences in earlier epidemics natural disasters and armed conflicts to offer lessons wisdom guidance and support to frontline workers while he wrote the essays as weekly reflections in the early months of the pandemic for the thousands of humanitarian relief workers he has trained around the world this book is a must read for anyone seeking to understand and make some sense of the complexities and chaos inevitable in a pandemic

Perspectives in a Pandemic 2020-09-08 the recent covid 19 global pandemic exemplifies the need for efficient reliable and real time tools and technology for forecasting and predicting healthcare disasters as well as for helping to restrict the subsequent spread and fatality of deadly diseases this new book discusses many of the innovative and state of the art tools and technology that can help meet the challenges of predicting such disasters the chapters offer a plethora of useful information for designing healthcare disaster management systems that can be dynamically configurable with implementation of today s modern technology such as cloud computing artificial intelligence iot data analytics and machine learning these can increase effectiveness in remote sensing technologies data analytics data storage communication networks geographic information system gis and global positioning system gps to name a few this book discusses mathematical models using graph based approaches
for analyzing dynamic heterogeneous and unstructured data for applications in epidemiology the authors also address the use of mobile applications for communication efforts and remote monitoring for gauging health and the effectiveness of preventive healthcare measures. The chapters discuss influencing factors that directly or indirectly target public health infrastructure that can lead to or exacerbate global health crises such as extreme climate changes, refugee health crises, terrorism, and cyberterrorism, and technology-related incidents. The book further looks at efficient methods to analyze disasters and how to deliver healthcare in areas of conflict and crisis. This important volume provides a bounty of useful information for health professionals, academicians, researchers, governmental agencies, and policymakers across the world to predict, mitigate, and manage global health crises with emerging technologies.

Global Healthcare Disasters 2022-08-04

The Coronavirus Pandemic 2021-08-01

The world has spent the majority of 2020 enduring an unprecedented crisis caused by the COVID-19 pandemic. The impact of this crisis has been enormous, and the situation has yet to be resolved. It is still difficult to anticipate when the pandemic will end and how our lives will have changed after the crisis. Higher educational institutions (HEIs) have had to undergo tremendous transformation, particularly changing a conventional educational teaching and learning system to a digital and online mode and cancelling or postponing important events such as graduation and entrance ceremonies and entrance examinations. In addition, a number of HEIs have been facing financial constraints due to reduced enrolment, particularly from overseas students, who have missed opportunities to meet their family and friends. Causing profound psychosocial impact and stress for all concerned simultaneously, however, the situation has given HEIs a good opportunity to consider their disaster preparedness response and recovery capacity on campus. Some surveys have highlighted a lack of preparedness for pandemic and other hazardous risks beyond natural hazards. Safety issues are a top priority at HEIs because they bring together a number of students, faculty, and staff. This book covers the experiences and lessons learned from HEIs in preparedness, response, and recovery during the COVID-19 pandemic to prepare for such calamities beyond natural disasters. In the future, the book consists of 15 chapters divided into three major sections that highlight the importance of HEI governance issues in disaster risk management, examine the challenges that HEIs have faced during the pandemic, and the implementation of new teaching and learning methodologies and provide innovative responses and preparedness by HEIs based on science and technology, respectively.

Safety and Resilience of Higher Educational Institutions 2022-06-21

This is the first comprehensive book that provides accessible international knowledge for practitioners, students, and academics about social work in health emergencies and spans fields of practice across world regions with particular reference to the COVID-19 pandemic. Divided into three sections—regional, historical, and social work perspectives—this book takes a journey through world regions during the first six months of the pandemic as it unfolded. It explores the lessons found in the history of pandemics and situates public health social work practice in the values of the profession, situating the diversity of challenges and opportunities in context. It examines current and future social work practice, social work practice issues and responses, and explores social work practice innovations and responses across eleven key practice fields. International authors feature social work responses during the COVID-19 health emergency from different regions of the world, preparing for the future, analysing broader concepts, innovations, and the implications for future practices as social work enters a new era of service delivery. The 20 chapters explore the convergence of pandemic politics and planet which is critiqued within a framework of the profession's
ethics and values of human dignity human rights and social justice social work's place in public health is firmly situated and built on the premise that the value social work brings to the table deserves recognition and should be documented to inform the development of the profession and future practice and how social work must carry lessons forward to prepare for the next pandemic the book is relevant to a wide range of audiences including practitioners educators and students in social work human services international development and public health as well as policy makers and researchers

Social Work in Health Emergencies 2022-02-28 gives an inside look at various kinds of disasters

Disasters: Anatomy of a pandemic 2011 this book discusses the science behind pandemics and their effects the chapters examine the deadliest pandemics in history explain how these diseases spread so quickly and show how scientists are working to prevent and contain future disease outbreaks diagrams charts and photos provide opportunities to evaluate and understand the scientific concepts involved

The Science of a Pandemic 2014-08-01 this issue of critical care clinics guest edited by drs marie baldisseri mary reed and randy wax in collaboration with consulting editor john kellum is devoted to intensive care unit in disaster topics in this issue include intensive care role in disaster management preparing the icu for disaster augmenting capacity triage natural disasters biological pandemic disasters chemical disasters radiation anthropogenic terrorist criminal act disasters special populations i e chronically ill morbidly obese pregnant pediatrics austere environments hospital as disaster ground zero and special considerations i e mental health ethics public relations

Intensive Care Unit in Disaster, An Issue of Critical Care Clinics 2019-08-24 crisis standards of care csc inform decisions on medical care during a large scale crisis such as a pandemic or natural disaster eliminating the need to make these decisions at the bedside without protections or guidance numerous points throughout the covid 19 pandemic have demonstrated the necessity of this type of crisis planning the national academies of sciences engineering and medicine forum on medical and public health preparedness for disasters and emergencies convened a series of public workshops to examine the experiences of healthcare providers during the covid 19 pandemic and identify lessons that can inform current and future csc planning and implementation the workshops examined staffing and workforce needs planning and implementation of csc plans and legal ethical and equity considerations of csc planning topics of discussion included improving coordination between the bedside and boardroom increasing buy in from elected officials expanding provider engagement and addressing health equity issues this publication summarizes the presentation and discussion of the workshops

Evolving Crisis Standards of Care and Ongoing Lessons from Covid-19: Proceedings of a Workshop Series 2023-03-15 this book will serve as a comprehensive resource to study the different dimensions of the pandemic from multi stakeholder's perspectives analyzing the forces that determine how and to which extent that stakeholders contribute during a pandemic what are the successful models and where are the chances of improvement

Stakeholder Strategies for Reducing the Impact of Global Health Crises 2021 the gripping inside account of australia's extraordinary pandemic story it was never part of the plan that australia would be locked down and shut off from the world for two years but when the covid 19 pandemic arrived in 2020 and the bodies began piling up overseas australians took unprecedented steps to avoid a catastrophe heading their way the country's near elimination of the deadly virus in the first phase of the pandemic saw it avoid tens of thousands of deaths but not all australians were sheltered from disaster and the strategy came with heavy costs many said goodbye to life as they knew it with unmatched access to australia's top politicians and pandemic officials life as we knew it is a gripping investigation into the nation's covid 19 response and its incredible untold
human stories it delves into the worst days of the pandemic and its terrible disasters but it also shows australians at their best the weird and the wonderful and a public spirit of collectivism over individualism that set the country apart the authors travel across the nation shedding new light on the disruptive outbreaks that plunged victoria and new south wales into lockdowns based on more than 150 interviews it also examines the unique experience of australia s covid zero states western australia queensland south australia and the northern territory places where it sometimes felt like the pandemic didn t exist many of the most significant moments in australia s pandemic happened behind closed doors life as we knew it unlocks the doors and looks inside

Life As We Knew It 2023-10-03 the open access version of this book available at taylorfrancis com books oa edit 10 1201 9781003181590 has been made available under a creative commons attribution non commercial no derivatives 4 0 license geospatial information plays an important role in managing location dependent pandemic situations across different communities and domains geospatial information and technologies are particularly critical to strengthening urban and rural resilience where economic agricultural and various social sectors all intersect examining the united nations sdgs from a geospatial lens will ensure that the challenges are addressed for all populations in different locations this book with worldwide contributions focused on covid 19 pandemic provides interdisciplinary analysis and multi sectoral expertise on the use of geospatial information and location intelligence to support community resilience and authorities to manage pandemics

COVID-19 Pandemic, Geospatial Information, and Community Resilience 2021-06-07 research paper postgraduate from the year 2021 in the subject pedagogy school system educational and school politics language english abstract the main concern in the study is how the schools and its administration manage this natural disasters even though that the world is facing these challenges with covid 19 the researcher aims to distinguish the management level of schools on how would they respond to natural disaster in accordance with the safety protocols of the government with regard to the pandemic this study also aims to determine how the school manage disasters in amidst of covid 19 pandemic hence the study also aims to measure the level of managing skills and capabilities of students and teachers moreover the researcher will make use of purposive sampling technique in order to determine samples to be used in the study furthermore the study is confine with the selected 42 grade 9 section 1 students of antonio j villegas vocational high school and 9 selected teacher representative for ndrrmc also the researcher will utilize a normative questionnaire for students and interview guide questionnaire for teachers based on the result and discussion it has been said that most of the student respondent possess manageable skills and are capable of perceiving approaching and responding to natural disaster thus same with the result on the focus group discussion of the teachers teacher s respondents possess manageable skills towards perceiving approaching and responding natural disaster however students have a vital interest in contributing to the safety of their school and community such work is central to their development as citizens and is in fact part of their ethical and moral responsibility to themselves their peers and school staff further trainings and seminars for teachers and school administration on how to develop their management skills in disasters

Managing School-Based Disasters Amid the Covid-19 Pandemic. Approaches of Response to Natural Disasters 2023-04 there was a time when the republic of korea rok became the second highest in the world for the number of daily confirmed cases of the coronavirus disease covid 19 but the country was able to quickly suppress the surge and reduce the number of confirmed cases this report discusses the key factors for the successful response of the rok to covid 19 during the early phase of the pandemic it analyzes how the rok has performed in terms of comprehensive disaster risk management the report also discusses lessons that the asian development bank s developing member countries can learn from the rok s covid 19 response experience

The Republic of Korea’s Coronavirus Disease Pandemic Response and Health System Preparedness 2021-09-01 this book considers how
the uk government's response to the recent covid 19 pandemic disadvantages the working class and how mutual aid based on anarchist principles can be used as a force for social change the authors draw on marxist and anarchist thought in class theory and social movement analysis to demonstrate that the virus and its material and discursive consequences are an active part of continuing class struggle and class interpolation preston and firth examine how plans for quarantine and social isolation systematically work against the needs of the working class and rely on classed assumptions about how markets and altruism operate in the face of neoliberal methods of dealing with a pandemic ranging from marketization disaster capitalism to a strengthening of the state coronavirus class and mutual aid in the united kingdom explains how radical alternatives such as social movements and mutual aid can be implemented to better cope with current and future crises

Coronavirus, Class and Mutual Aid in the United Kingdom 2020-11-26 from extreme weather events such as superstorm sandy man made tragedies like the madrid train bombings the threat of bioterrorism and emerging infections such as the h1n1 pandemic flu disasters are creating increasingly profound threats to health of populations around the globe through a presentation of 16 case studies of events from natural disasters to pandemic infection the authors examine the broad range of public health scenarios through the lens of emergency preparedness and planning this text demonstrates the application of public health preparedness competencies established by the association of schools of public health asph it is designed for students across a wide spectrum of health and safety disciplines and makes an ideal complement to any text on disaster preparedness or public health leadership or can be used as a standalone text

Case Studies in Public Health Preparedness and Response to Disasters 2013-08-02 an inside account of the fight to contain the world's deadliest diseases and the panic and corruption that make them worse throughout history humankind's biggest killers have been infectious diseases the black death the spanish flu and aids alone account for over one hundred million deaths we ignore this reality most of the time but when a new threat ebola sars zika coronavirus seems imminent we send our best and bravest doctors to contain it people like dr ali s khan in his long career as a public health first responder protected by a thin mask from infected patients napping under nets to keep out scorpions making life and death decisions on limited suspect information khan has found that rogue microbes will always be a problem but outbreaks are often caused by people we make mistakes politicize emergencies and too often fail to imagine the consequences of our actions the next pandemic is a firsthand account of disasters like anthrax bird flu and others and how we could do more to prevent their return it is both a gripping story of our brushes with fate and an urgent lesson on how we can keep ourselves safe from the inevitable next pandemic

Doom 2021-05-04 you need to develop a pandemic epidemic and or disaster response strategy to cater to 3 events a what happens if the pandemic or disaster cannot be avoided b how to manage the pandemic or disaster from escalating and crippling the facilities and c how to allow the company to get back to operations as soon as possible what if you had one tool that you could carry into meetings and write inside that guided you step by step to build the business case for your strategy generate the size of the prize guide your team design the tests for the hypotheses conduct focus interviews analyze your strategy analyze your implementation analyze your treatment capacity calculate the cost of the pandemic to your business build detailed treatment maps calculate costs and bottleneck costs in the treatment process prioritize your response determine how to care for employees while keeping the business running calculate the bottom up benefits case lay the foundation for a pilot implementation track your daily and weekly tasks plan each major meeting plan the message for your team and manager manage the project and guide you through critical update meetings now you do the pandemic disaster strategy journal is the companion guide to our popular books succeeding as a management consultant the strategy engagement and the strategy journal an amazon bestseller this journal helps readers walk into any situation in any organization anywhere in the world and understand how to develop a pandemic and disaster strategy via to do list prompts self
