Australian pharmacy law practice includes important sections on legal concepts and the Australian constitution, the evolution of pharmacy practice and ethics, privacy legislation, occupational health and safety, and professional conduct including matters regarding investigation, discipline, and legal proceedings. Australian pharmacy law practice is the first text of its kind to address pharmacy practice in all its facets in the unique context of the Australian legal framework. It will be a valuable resource to students and overseas trained pharmacists seeking registration in Australia as well as to qualified practitioners who seek to better understand the laws and standards that govern the profession unique to the Australian marketplace. Presently, there is no publication dealing specifically with pharmacy law and ethics in this country.

Each chapter includes learning objectives, review questions, and activities, and further readings. The inclusion of quotations from case law provides an opportunity for readers to learn from history. The foundations of good prescribing are quality engagement with trusted healthcare staff, access to knowledgeable and skilled personnel, and full involvement in decisions about care. Beginning with a discussion of how prescribing practices have evolved, this book then proceeds to outline how non-medical prescribing is now implemented from the perspectives of nurses, pharmacists, and allied health professionals. It explores the impact on practice and integrates the views and experiences of patients and service users as individuals assume responsibility for their own health and select from a range of treatment options.

The findings reported in this book describe the challenges posed by policy initiatives and the implications they have for healthcare personnel. It highlights areas in which further organisational change is required before the full impact of non-medical prescribing will be felt. The last ten years has seen significant regulatory changes and the issuing of professional advice to match developments in clinical practice. It has not been easy for clinicians to keep pace with the changes or to find information on how and when changes have occurred. This text provides an essential source to guide optometrists through the current regulatory and professional expectations. Although specifically designed for the optometrist, the text will also be useful to anyone involved in the provision, regulation and monitoring of optometry services in the UK. Detailed chapters on the Opticians Act, General Optical Council and the National Health Service General Ophthalmic Service Regulations provide a foundation on the regulation for optometry.
practice these chapters trace the development of the regulatory framework and the different roles played by various organisations and government additional chapters cover more detailed issues including requirements for continuing professional development delegation and supervision contact lenses referrals case records and data protection fitness to practice and drugs and optometry these all impact on day to day aspects of optometric practice and it is important for optometrists to understand how the requirements in these areas may affect an individual's ability to practise the text also provides a useful reference source and a list of regulations relating to optometry practice in the uk
