christianity the varying forms of arab civilization and its inability in more modern times to fulfill the dreams of nineteenth and twentieth century reformers continued stereotyping of the arab world within the media the arab diaspora is essential reading for those with interests in arabic and middle east studies and cultural studies studies in islamic civilization draws upon the works of western scholars to make the case that without the tremendous contribution of the muslim world there would have been no renaissance in europe for almost a thousand years islam was arguably one of the leading civilizations of the world spanning a geographic area greater than any other it eliminated social distinctions between classes and races made clear that people should enjoy the bounties of the earth provided they did not ignore morals and ethics and rescued knowledge that would have been lost if not forever then at least for centuries the genius of its scholars triggered the intellectual tradition of europe and for over seven hundred years its language arabic was the international language of science strange then that its legacy lies largely ignored and buried in time in the words of aldous huxley great is truth but still greater from a practical point of view is silence about truth by simply not mentioning certain subjects propagandists have influenced opinion much more effectively than they could have by the most eloquent denunciations studies in islamic civilization is a compelling attempt to redress this wrong and restore the historical truths of a golden age that ushered in the islamic renaissance and as a by product that of the west in doing so it gives a bird s eye view of the achievements of a culture that at its height was considered the model of human progress and development studies in islamic civilization is a must read for scholars students and non specialists alike demonstrating the world class civilization created by muslims and its forgotten and long overlooked contributions to western civilization in just over a hundred years from the death of muhammad in 632 to the beginning of the abbasid caliphate in 750 the followers of the prophet swept across the whole of the middle east north africa and spain their armies threatened states as far afield as the franks in western europe and the tang empire in china the conquered territory was larger than the roman empire at its greatest expansion and it was claimed for the arabs in roughly half the time how this collection of arabian tribes was able to engulf so many empires states and armies in such a short period of time is a question that has perplexed historians for centuries most recent popular accounts have been based almost solely on the early muslim sources which were composed centuries later for the purpose of demonstrating that god had chosen the arabs as his vehicle for spreading islam throughout the world in this ground breaking new history distinguished middle east expert robert g hoyland assimilates not only the rich biographical and geographical information of the early muslim sources but also the many non arabic sources contemporaneous or near contemporaneous with the conquests the story of the conquests traditionally begins with the revelation of islam to muhammad in god s path however begins with a broad picture of the late antique world prior to the prophet s arrival a world dominated by the two superpowers of byzantium and sasanian persia the two eyes of the world in between these empires in western saudi arabia emerged a distinct arab identity which helped weld its members into a formidable fighting force the arabs are the principal actors in this drama yet as hoyland shows the peoples along the edges of byzantium and persia the khazars bulgars avars and turks also played important roles in the remaking of the old world order the new faith propagated by muhammad and his successors made it possible for many of the conquered peoples to join the arabs in creating the first islamic empire well paced and accessible in god s path presents a pioneering new narrative of one the great transformational periods in all of history this book is a comprehensive reference on the history of arabic language and script which goes beyond the sole discussion of technical matters it studies objectively the evidence presented by modern day western archeological discoveries together with the evidence presented by the indispensable scholarly work and research of the past islamic arab civilization era the book scrutinizes modern western theories about the history of the arabs and arabic language and script in connection with the roles played by western near east scholarship religion and colonial history in the formation of current belief system vs arab history and language which is an essential step to study this correlated and complex topic objectively in his book the author explores the relevant facts of history and geography
as crucial defining factors in the study of history of Arabic language and script he offers a brief balanced account on the important topic of Muhammad leadership and Islam in the formation of Arabia and investigates the Qur'an as a key evidence and reference of the Arabic language and script as a research tool this book presents in depth tracings and readings of the most relevant inscriptions and the findings accumulated by the author over one and a half year of research particularly it presents new comprehensive readings of the important Umm al Jimal and Al Namarah Nabataean Arabic inscriptions the Al Namarah stone which was discovered by French archeologist Dussaud in 1901 displayed today on a wall in the Louvre museum of Paris was assumed for more than a century to be the tombstone of the prominent Pre-Islamic Arab king Umm al Qays bin Amru after re-tracing and re-reading its complex inscription the author concluded it was actually about a previously unknown personality named Akdi possibly a high ranking Arab soldier in the Roman army or an Arab tribal leader not the burial stone of King Umm al Qays or even about him similarly the author proves beyond doubt that the important Umm al Jimal Nabataean Arabic inscription was not the burial stone of Fahru bin Salih but Faru bin Salih the two inscriptions are among only four Nabataean inscriptions believed by western scholars to be written in the old Arabic language these are referenced heavily today as evidence linking the Arabic script to the Nabataean Aramaic script utilizing classic Arabic and grammar tools and challenging their accuracy at times the author findings in this book could potentially amend several historical and linguistic facts as told today by history textbooks in his book the author a known Arabic type designer studies with an investigative expert eye the early shapes of the Pre-Islamic Arabic script and compares them to those of Musnad Arabic and late Nabataean Aramaic inscriptions in addition to those of the early Islamic Arabic manuscripts and papyri he concludes that the early Arabic script was not an evolved Nabataean script but likely an independently derived script of the old Musnad Arabic script with clear Nabataean influence although this book is conceived as a reference tool for scholars and researchers other readers may find its topics and captivating arguments valid enough to debate and to study further all chapters can be read independently there are more than 40 figures and illustrations to aid the reader throughout the book the first two chapters are intended as introductory essays regarding the history of Arabia people and language and the role of Western scholarship to facilitate the selective and independent reading of the last three chapters which presents the author research findings and conclusions the book included in addition to the chapter specific references already offered throughout the whole book chapter specific introductions and conclusions whoever lives in our country speaks our language is brought up in our culture and takes pride in our glory is one of us thus ran a declaration of modern leaders of Arab states but what exactly is an Arab and what has been their place in the course of human history in this well established classic professor Lewis examines the key issues of Arab development their identity the national revival which cemented the creation of the Islamic state and the social and economic pressures that destroyed the Arab kingdom and created the Islamic empire he analyses the forces which contributed to that empire's eventual decline and the effects of growing Western influence today with the Arab world facing profound social and political challenges it constitutes an essential introduction to the Arabs and their history the fascinating story of how an English scholar brought Arab learning to the west and rescued it from the dark ages a wonderful and important book which for the first time presents the Western debt to Medieval Arabic learning in a clear accessible manner from the azimuth to the zenith from algebra to the zero so much of what the West takes for granted came to us from the Arab world a fascinating book William Dalrymple Lyons tells the story of the house of wisdom the Caliphs who supported it and the people who worked there at a riveting breakneck pace the times for centuries following the fall of Rome Western Europe was backward and benighted locked into the dark ages and barely able to tell the time of day Arab culture however was thriving and had become a powerhouse of intellectual exploration and discussion that dazzled the likes of British adventurer Adelard of Bath the Arabs could measure the Earth's circumference a feat not matched in the west for eight hundred years they discovered algebra were adept at astronomy and navigation developed the astrolabe translated all the Greek scientific and philosophical texts including importantly those of Aristotle without them and the knowledge that travelers like Adelard brought back to the west Europe would have been a very different place over the last millennium Jonathan Lyons restores credit to the Arab thinkers of
the past in this riveting history of science from its earliest and most thrilling days. an account of the arrival of the arabs in spain and the civilization they created there. includes an introduction to islam and the journey of the islamic expansion until the conquest concentrating on the intellectual activities of moorish spain. sexual desire has long played a key role in western judgments about the value of arab civilization in the past. westerners viewed the arab world as licentious and western intolerance of sex led them to brand arabs as decadent but as western society became more sexually open the supposedly prudish arabs soon became viewed as backward rather than focusing exclusively on how these views developed in the west. in desiring arabs joseph a. massad reveals the history of how arabs represented their own sexual desires to this aim he assembles a massive and diverse compendium of arabic writing from the nineteenth century to the present in order to chart the changes in arab sexual attitudes and their links to arab notions of cultural heritage and civilization. a work of impressive scope and erudition. massad’s chronicle of both the history and modern permutations of the debate over representations of sexual desires and practices in the arab world is a crucial addition to our understanding of a frequently oversimplified and vilified culture. a pioneering work on a very timely yet frustratingly neglected topic. i know of no other study that can even begin to compare with the detail and scope of this work. khaled el rouayheb middle east report in desiring arabs edward said’s disciple joseph a. massad corroborates his mentor’s thesis that orientalist writing was racist and dehumanizing. massad brilliantly goes on to trace the legacy of this racist internalized orientalist discourse up to the present financial times few works of history make as well structured a case for the importance of studying continuity rather than change than albert hourani’s a history of the arab peoples. hourani’s work had three major aims to refute the idea that arab society stagnated between 1000 and 1800 to study the period through the lens of diverse arab rather than muslim history and to stress intellectual and cultural continuity all of these intentions were the product of the author’s evaluation of a great mass of secondary sources. many of them devoted to arguing for ideas that contradicted his and it demanded considerable skill to synthesize from them a coherent and well evidenced counter argument. hourani was able to do this largely because his grasp of the relevance and adequacy of his predecessors arguments was second to none. his achievement lies in his ability to reject the reasoning of other historians while still making good use of their evidence in this task he was aided by an interpretative skill almost equal to his powers of evaluation. a history of the arab peoples is also a monument to the importance of properly understanding the meaning of available evidence. this book discusses arab history law philosophy politics and literature analyzing the challenges and responses aroused by the interaction between western culture and the ancient and modern arab cultures. it offers a wealth of information on the forces that have shaped arab civilization and on several of the major figures who have contributed to its development. some of the outstanding contributions include a comprehensive study of dr. zurayk as the advocate of rationalism in modern arab thought by hani a. faris a sober but challenging look at the use of islamic history in our time by muhsin mahdi an analysis of the expression of historicity in the koran by jacques berque an explanation of the concept of equity in civilization of the arabs brought a medieval golden age that unified the whole west and south asia northern africa and southeastern europe stretching from mesopotamia iraq persia iran asia minor turkey egypt the arabian peninsula and india to the backdoors of the european continent. the book written by j. j. saunders a historian of middle age islam poignantly narrated the islamic and arab historiography in his book published in 1965 entitled a history of medieval islam. which have explicitly expressed a well crafted academic research work during the medieval society of west asia and the political interventions of different empires who have had occupied the whole boundless yet fragile region the proponent will succinctly try to examine this hypothesis whether an indispensable Islam will be the subject of a critical analysis. Islam is one of the Semitic religions and one of the greatest religions of the world. It is not easy to present a complete description of this religion in a compact survey as this book is. It is also not easy to understand the practical life of the Muslims without some knowledge of their religious social life for that one needs to have a complete understanding of the principal institution of Islam—a compact exposition of Muslim institutions covers at least important aspects of Arab Muslim life. Keeping in mind these facts, I have tried to deal with the origin, background, and the rise of Islam, the dogmas, and the superstitions of the faith, the sources and practice of Muslim law, the family life, and Sufism. It packs an immense amount of information even though there are still other aspects to be dealt with. Concerning the life of the Prophet, it is well known that Muhammad bin Abdullah was born about 570 C.E. in Makkah, the son of a Korashite family orphaned early. He grew up under the care of his nearest relatives. His father had already died, and so he was brought up by his nearest relatives—his grandfather and his uncle. He was a shepherd during his boyhood. It is also reported that unlike other boys, Muhammad was thoughtful rather than playful. At the age of about twenty-five, he became the business adviser of a famed widow named Khadija, who was fifteen years his senior. Eventually, he became her third husband. We do not know much about his early religious life; he seems however to have begun early to meditate on the values of life and to have had an unusually nervous high-strung constitution. At the age of forty, he started receiving the divine work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This book sheds light on the various aspects of the impact of pre-Islamic Iranian literature and culture on Arabic literature and Islamic culture following the Arab conquests and the collapse of the Sassanid Empire in Iran in the seventh century. It covers a period in Iranian literary history dominated by the Arabic language which was the language of the Quran when Iranian scholars and administrators were transferring Iran's literary and administrative heritage through translation of Iranian books into Arabic and adaptation of Iranian traditions and practices including the Sassanid administrative financial and agricultural systems and various cultural practices to the Islamic Caliphate thus ensuring their survival in a period of turmoil and transition from the Sassanids to the Islamic periods the book relies on scattered references in Arabic sources mainly from the first centuries of Islam as the original Iranian sources did not survive the Arab conquests. A primary reason why this area of scholarly research has remained mostly in the dark the significance of research in this area is that without exposing and understanding of their Iranian roots it is not possible to have a deep and comprehensive understanding of Arab and Islamic literature and culture and particularly their rapid expansion and diversification during the early centuries of Islam. The work has been translated by Shahrokh Mohammadi, son of the author.

preface the author of this very practical treatise on scotch loch fishing desires clearly that it may be of use to all who had it he does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible the writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general this section is interleaved with blank sheets for the readers notes the author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition we do not pretend to write or enlarge upon a new subject much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when me say that on the whole a days loch fishing is the most convenient one great matter is that
the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best a common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat of all the absurd beliefs as to loch fishing this is one of the most absurd try it give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance again it is said that the boatman has as much to do with catching trout in a loch as the angler well we dont deny that in an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

peoples along the edges of byzantium and persia the khazars bulgars avars and turks also played
important roles in the remaking of the old world order the new faith propagated by muhammad and
his successors made it possible for many of the conquered peoples to join the arabs in creating the
first islamic empire well paced and accessible in god s path presents a pioneering new narrative of
one the great transformational periods in all of history

A History of the Arab Peoples 2023-08-09

this book is a comprehensive reference on the history of arabic language and script which goes
beyond the sole discussion of technical matters it studies objectively the evidence presented by
modern day western archeological discoveries together with the evidence presented by the
indispensable scholarly work and research of the past islamic arab civilization era the book
scrutinizes modern western theories about the history of the arabs and arabic language and script in
connection with the roles played by western near east scholarship religion and colonial history in the
formation of current belief system vs arab history and language which is an essential step to study
this correlated and complex topic objectively in his book the author explores the relevant facts of
history and geography as crucial defining factors in the study of history of arabic language and script
he offers a brief balanced account on the important topic of muhammad leadership and islam in the
formation of arabia and investigates the quran as a key evidence and reference of the arabic
language and script as a research tool this book presents in depth tracings and readings of the most
relevant inscriptions and the findings accumulated by the author over one and a half year of
research particularly it presents new comprehensive readings of the important umm al jimal and al
namarah nabataean arabic inscriptions the al namarah stone which was discovered by french
archeologist dussaud in 1901 displayed today on a wall in the louvre museum of paris was assumed
for more than a century to be the tombstone of the prominent pre islamic arab king umru al qays bin
amru after re tracing and re reading its complex inscription the author concluded it was actually
about a previously unknown personality named akdi possibly a high ranking arab soldier in the
roman army or an arab tribal leader not the burial stone of king umru al qays or even about him
similarly the author proves beyond doubt that the important umm al jimal nabataean arabic
inscription was not the burial stone of faihru bin sali but faru bin sali the two inscriptions are among
only four nabataean inscriptions believed by western scholars to be written in the old arabic
language these are referenced heavily today as evidence linking the arabic script to the nabataean
aramaic script utilizing classic arabic and grammar tools and challenging their accuracy at times the
author findings in this book could potentially amend several historical and linguistic facts as told
today by history textbooks in his book the author a known arabic type designer studies with an
investigative expert eye the early shapes of the pre islamic arabic script and compares them to
those of musnad arabic and late nabataean aramaic inscriptions in addition to those of the early
islamic arabic manuscripts and papyri he concludes that the early arabic script was not an evolved
nabataean script but likely an independently derived script of the old musnad arabic script with clear
nabataean influence although this book is conceived as a reference tool for scholars and researchers other readers may find its topics and captivating arguments valid enough to debate and to study further all chapters can be read independently there are more than 40 figures and illustrations to aid the reader throughout the book the first two chapters are intended as introductory essays regarding the history of arabia people and language and the role of western scholarship to facilitate the selective and independent reading of the last three chapters which presents the author research findings and conclusions the book included in addition to the chapter specific references already offered throughout the whole book chapter specific introductions and conclusions

The Evolution of Arab Civilization 1975

whoever lives in our country speaks our language is brought up in our culture and takes pride in our glory is one of us thus ran a declaration of modern leaders of arab states but what exactly is an arab and what has been their place in the course of human history in this well established classic professor lewis examines the key issues of arab development their identity the national revival which cemented the creation of the islamic state and the social and economic pressures that destroyed the arab kingdom and created the islamic empire he analyses the forces which contributed to that empire s eventual decline and the effects of growing western influence today with the arab world facing profound social and political challenges it constitutes an essential introduction to the arabs and their history

The Genius of Arab Civilization 1976

the fascinating story of how an english scholar brought arab learning to the west and rescued it from the dark ages a wonderful and important book which for the first time presents the western debt to medieval arabic learning in a clear accessible manner from the azimuth to the zenith from algebra to the zero so much of what the west takes for granted came to us from the arab world a fascinating book william dalrymple lyons tells the story of the house of wisdom the caliphs who supported it and the people who worked there at a riveting breakneck pace the times for centuries following the fall of rome western europe was backward and benighted locked into the dark ages and barely able to tell the time of day arab culture however was thriving and had become a powerhouse of intellectual exploration and discussion that dazzled the likes of british adventurer adelard of bath the arabs could measure the earth s circumference a feat not matched in the west for eight hundred years they discovered algebra were adept at astronomy and navigation developed the astrolabe translated all the greek scientific and philosophical texts including importantly those of aristotle without them and the knowledge that travelers like adelard brought back to the west europe would have been a very different place over the last millennium jonathan lyons restores credit to the arab thinkers of the past in this riveting history of science from its earliest and most thrilling days

sexual desire has long played a key role in western judgments about the value of arab civilization in the past westerners viewed the arab world as licentious and western intolerance of sex led them to brand arabs as decadent but as western society became more sexually open the supposedly prudish arabs soon became viewed as backward rather than focusing exclusively on how these views developed in the west in desiring arabs joseph a massad reveals the history of how arabs represented their own sexual desires to this aim he assembles a massive and diverse compendium of arabic writing from the nineteenth century to the present in order to chart the changes in arab sexual attitudes and their links to arab notions of cultural heritage and civilization a work of impressive scope and erudition massad s chronicle of both the history and modern permutations of the debate over representations of sexual desires and practices in the arab world is a crucial addition to our understanding of a frequently oversimplified and vilified culture a pioneering work on a very timely yet frustratingly neglected topic i know of no other study that can even begin to compare with the detail and scope of this work khaled el rouayheb middle east report in desiring arabs edward said s disciple joseph a massad corroborates his mentor s thesis that orientalist writing was racist and dehumanizing massad brilliantly goes on to trace the legacy of this racist internalized orientalist discourse up to the present financial times

Islamic Dynasties of the Arab East 2006-07

few works of history make as well structured a case for the importance of studying continuity rather than change than albert hourani s a history of the arab peoples hourani s work had three major aims to refute the idea that arab society stagnated between 1000 and 1800 to study the period through the lens of diverse arab rather than muslim history and to stress intellectual and cultural continuity all of these intentions were the product of the author s evaluation of a great mass of secondary sources many of them devoted to arguing for ideas that contradicted his and it demanded considerable skill to synthesize from them a coherent and well evidenced counter argument hourani was able to do this largely because his grasp of the relevance and adequacy of his predecessors arguments was second to none his achievement lies in his ability to reject the reasoning of other historians while still making good use of their evidence in this task he was aided by an interpretative skill almost equal to his powers of evaluation a history of the arab peoples is also a monument to the importance of properly understanding the meaning of available evidence

Arab Civilization to Ad 1500 1983

this book discusses arab history law philosophy politics and literature analyzing the challenges and responses aroused by the interaction between western culture and the ancient and modern arab cultures it offers a wealth of information on the forces that have shaped arab civilization and on several of the major figures who have contributed to its development some of the outstanding contributions include a comprehensive study of dr zurayk as the advocate of rationalism in modern arab thought by hani a faris a sober but challenging look at the use of islamic history in our time by muhsin mahdi an analysis of the expression of historicity in the koran by jacques berque an explanation of the concept of equity in islamic law by majid khadduri and the revelation of a mamluk

In God's Path 2011

This book sheds light on the various aspects of the impact of pre-Islamic Iranian literature and culture on Arabic literature and Islamic culture following the Arabic conquests and the collapse of the Sassanid Empire in Iran in the seventh century. It covers a period in Iranian literary history dominated by the Arabic language, which was the language of the Quran, when Iranian scholars and administrators were transferring Iran's literary and administrative heritage through translation of Iranian books into Arabic and adaptation of Iranian traditions and practices, including the Sassanid administrative, financial, and agricultural systems and various cultural practices to the Islamic Caliphate, thus ensuring their survival in a period of turmoil and transition from the Sassanid to the Islamic periods. The book relies on scattered references in Arabic sources mainly from the first centuries of Islam, as the original Iranian sources did not survive the Arab conquests. A primary reason why this area of scholarly research has remained mostly in the dark is that without exposing and understanding of their Iranian roots, it is not possible to have a deep and comprehensive understanding of Arab and Islamic literature and culture and particularly their rapid expansion and diversification during the early centuries of Islam. The work has been translated by Shahrokh Mohammadi, son of the author.
